Technical Skills

HTML, CSS, Bootstrap, JavaScript, JQuery, Node.js, MySQL, APIs, React.js, Github, Visual Studio Code,

Heroku, Matlab, Microsoft Office Suite, Microsoft Visio, Adobe Photoshop, Autodesk Sketchbook Pro

Projects

UFO Sightings (MySQL, Express.js, HTML, CSS)
(https://thawing-falls-83035.herokuapp.com/) (https://github.com/dpete016/UFO)
- A web application which shows a data of UFO sightings seen across the United States. Users can narrow down the search by inserting a specific date to filter results and find a pattern**.** Dat**a** of the sightings are from a SQL database linked by Node.js.

LazyBoi (MySQL, Node.js, JavaScript, JQuery, HTML, CSS)
(https://fast-eyrie-91834.herokuapp.com/) (https://github.com/dpete016/Lazy-Boi)
- A music application designed for users to search for music, stream music and create a playlist. Usernames and playlists are stored in an SQL database so that the playlists can be edited and accessed by each user for ease of use.

Bone Apple Tea (JavaScript, jQuery, HTML, CSS)
(https://xpetrus.github.io/p1-boneappletea/) https://github.com/dpete016/p1-boneappletea)
- A web application created for users to input an ingredient to find recipes of all varieties. Results of the ingredient search include the picture of the recipe, nutritional facts and YouTube videos of instructions. Recent searches are stored and shown while new recipes will be seen with each new search.

Experience

Freelance Illustration   **October 2018 - Present**
- Utilize various programs to create and complete commissions on behalf of clients and organizations.
- Consult with clients through various methods of contact to ensure the scope and budget were met.
- Produced various typography, official logos and original works.

Education

Rutgers Coding Bootcamp, Somerset NJ
Certificate in Fullstack Web Development

New Jersey Institute of Technology, Newark NJ
2017 Bachelor of Science, Chemical Engineering.
